Scan receipts to create expenses

Now, instead of entering all your expense information manually, you can save time by taking a photo of a receipt. Spliit will use AI to extract information from it and fill the expense.

Announcing Receipt Scanning Using AI

January 31, 2024 · Sebastien

When I created Spliit, I wanted it to be minimalist and not implement dozens of features that nobody uses. Spliit is an open source project, and many users suggest features (see the issues on GitHub). It is sometimes hard to decide which features are worth implementing. This time, it was an easy choice: if I can make it faster to create expenses, I have to do it.
